

# GLOBAL SARKOO GROUP

**Excellence in International Trade  
& Premium Commodity Solutions**

# ALUMINIUM INGOT A7 99.70%

We supply high-purity Aluminium Ingots (A7 grade, 99.70% purity), essential for various industrial applications including automotive, aerospace, and construction. Our products meet rigorous international quality standards.

## Key Features:

- Purity Level: 99.70% Minimum
- Grade: A7 Standard
- Applications: Casting & Extrusion
- Global Supply Chain Logistics

# NATURAL SESAME SEEDS

Sourced from the finest farms, our natural sesame seeds are known for their rich oil content and distinct nutty flavor. We process and pack our seeds under strict hygienic conditions.

## Key Features:

- Type: Natural, premium quality
- High Oil Content
- Purity: Sortex-quality available
- Export-standard durable sacks

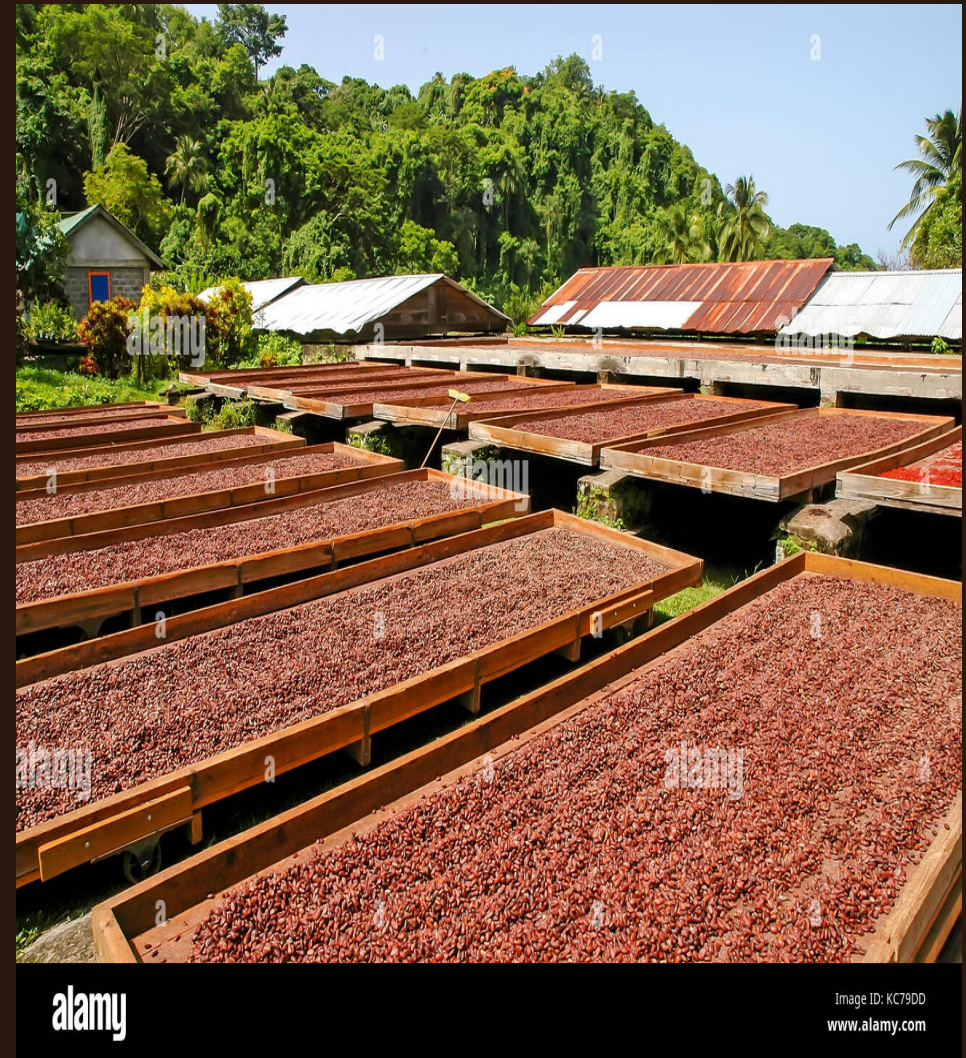

# PREMIUM COCOA BEANS

Our cocoa beans are harvested at peak ripeness and traditionally fermented to develop their deep, complex chocolate aroma. We provide high-quality raw beans to chocolatiers worldwide.

## Key Features:

- Origin: Premium African plantations
- Expertly fermented and sun-dried
- Low moisture content
- Ideal for premium chocolate production

# CASHEW & PREMIUM NUTS

We offer a diverse selection of premium nuts, including high-grade cashews, known for their creamy texture and large size. Carefully selected and processed for maximum freshness.

## Key Features:

- Products: Cashews, Walnuts, Almonds
- Grading: International Standards
- Nitrogen-flushed packaging
- Rich in healthy fats & proteins

# AFRICAN COFFEE

Experience the bold and vibrant flavors of authentic African coffee. Selected for their unique acidity and aromatic profiles, offering a premium experience for specialty roasters.

## Key Features:

- Varieties: Arabica & Robusta
- Unique aromatic profiles
- Green (raw) or expertly roasted
- Supporting local farming communities

# ALFALFA - THE KING OF FORAGES

Alfalfa is highly prized for its nutrient density and buffering capacity. It is recognized globally as one of the most vital legume crops due to its exceptional nutritional profile.

## Nutritional Specifications:

- Crude Protein (CP): 15% to 22%
- Crude Fiber (CF): 20% to 30%
- Total Digestible Nutrients (TDN): 55% to 65%
- Minerals: Rich in Calcium (1.5 - 2.5), Phosphorus, and Potassium
- Vitamins: High concentration of A, B, C, D, E, and K

# RHODES GRASS - OPTIMAL FORAGE

Rhodes grass is highly valued for its exceptional resilience and ability to thrive in challenging environments, providing a stable and nutritious forage source.

## Key Features:

- Essential fiber for rumen health
- Stable protein content (8%-12%)
- Primary forage for arid climates
- Efficient storage logistics

# SILAGE - PRESERVED FRESHNESS

Silage is the result of fermenting green fodder in an anaerobic environment to preserve its nutritional value and freshness throughout the year.

## Key Features:

- Retains moisture & palatability
- High in starch & carbohydrates
- Enhances feed conversion
- Wrapped bales for anaerobic conditions

# QUALITY STANDARDS & LOGISTICS

## Certifications

Mandatory Phytosanitary Certificates ensure all products are free from pests and diseases, complying with international trade regulations.

## Packaging

High-density compression techniques and specialized export packaging maximize shipping efficiency and protect product integrity.

## Logistics

Precise coordination between production facilities and global ports ensures timely delivery and maintains the nutritional integrity of all goods.
